Printers for industrial demands

Our professional printers are used in a wide variety of applications. During development, we focused first and foremost on simple and convenient operation coupled with high reliability. The printing units and housings are made of high-quality materials and are perfectly matched in terms of their form and function. Extensive peripherals and software enable customized solutions – any time.

Regardless of whether the A+ printer is operated as a stand-alone solution, a PC application or in a network, it is always up to the mark! The high-speed processor ensures fast job processing and immediate label output.

Accurate and fast output of small and large labels

PCB label

Smallest label size measuring 4 x 4 mm, if there is only little space available.

Nameplates

Sharp fonts, graphics and barcodes with 600 dpi.

Shipping and pallet labels

Labels up to standard A4 format.

Overview types of industrial printers A+ series

The Sleek

For small labels with high printing accuracy.

1.1 Label printer	A	2+
Print resolution dpi	300	600
Print width up to mm	54,2	57
Print speed up to mm/s	150	100

The Universal

Our top-seller with high printing accuracy and an extensive range of accessories. A4.3⁺ preferably for thermal direct printing.

1.2	Label printer	A4+			A4.3+		
	Print resolution dpi	203	300	600	203	300	
	Print width up to mm	104	105,6	105,6	104	108,4	
	Print speed up to mm/s	250	250	100	200	150	

The Wide

Ideal for Odette- and UCC labels.

1.3 Label print	er	Α	6+
Print resoluti	on dpi	203	300
Print width u	p to mm	168	162,6
Print speed	up to mm/s	200	200

The Extra Wide

For pallet and drum labeling.

1.4	Label printer	A8+
	Print resolution dpi	300
	Print width up to mm	216
	Print speed up to mm/s	150

Basic version

For printing on labels and and continuous material. The material is torn off at the jagged tear-off edge. Optionally, it may be cut off or rewound externally.

Dispensing version

For printing and dispensing labels. The label is removed from the liner during the printing process by utilizing the internal rewinder. It can be removed manually, by applicator or robot.

Common details

1 White graphic display

With backlight for optimum readability.

2 Ribbon holder

Three-part tightening axles enable quick and easy ribbon exchange.

3 Straightforward adjustment

The printhead is pressed down with two sliding toggles. One is mounted to the left label margin, the other is pushed to the right label margin.

4 Peripheral connection

Add-on modules such as cutters, external rewinders, present sensors and applicators are easy to connect via the USB peripheral interface. All peripherals are connected to the printer in seconds using two pins and fixed in place with a screw.

5 Solid metal housing

Made of die-cast aluminum. All components are mounted on it.

6 Roll holder

Available for core diameters from 38 mm. (We provide adapters for core diameters wider than 76 mm for improved label winding). The spring-mounted margin stop ensures constant tension during feeding, thus ensuring a highly precise imprint.

Internal rewinder

The three-part tightening axles ensure the easy rewinding and removing of labels or liners with or without paper core.

8 Peel-off option

The label is removed from its liner via a peel-off plate. A high printing and dispensing accuracy can be achieved with the additionally powered rewind assist roller and the pinch roller.

Compact cover

The 2-part cover made of impact-resistant ABS plastic folds up when opened.

1.11 Metal cover

On request, the A4⁺ and A6⁺ transfer printers are also available with a metal cover. (as standard for the A8⁺).

For special demands

With centered material guide

Preferred for small and thick endless materials like flattened tubes, tapes or very small labels.

- No adjustment of the printhead for different widths of material
- Printing on very small or very thick continuous materials
- Print speed for difficult to print materials is reducible
- Operation and control are compatible with the A⁺ series

1.5 Labe	el printer	A4 ⁺ M	
Print	resolution dpi	300	600
Print	width up to mm	105,6	105,6
Print	speed up to mm/s	125	100

For double-sided printing

For simultaneous front and back printing via two stacked printing units. Preferred for flattened tubes, continuous or prefabricated, and paper, synthetic or cardboard materials.

- No adjustment of the printhead for different widths of material
- Printing on very small or very thick continuous materials
- Print speed for difficult to print materials is reducible
- Operation and control are compatible with the A⁺ series

1.6 Label printer	XD4
Print resolution dpi	300
Print width up to mm	105,6
Print speed up to mm/s	125

Accessories

Cutter

Used to cut paper, self-adhesive labels, cardboard, textile or synthetic materials and heat shrink tubes.

Perforation and cutter

Used to enable the perforation of the material for manual separation.

Stacker with cutter

The printed materials are cut and stacked. The print job is stopped as soon as the maximum stack height is reached. Even stiff or curved materials may be processed to some extent. We recommend to do the material testings at our facilities.

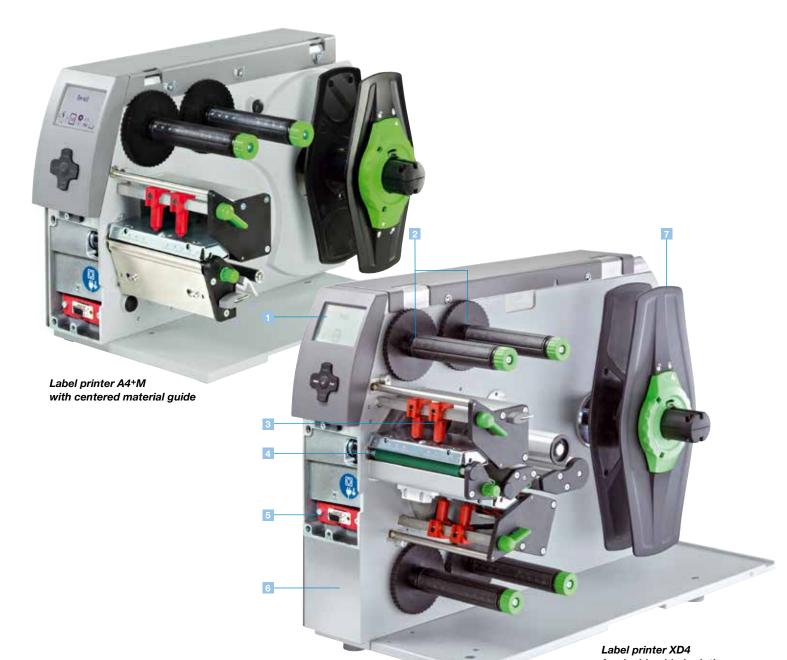

Print rollers for small and thin materials

Outside the material width the printhead rubs against the print rollers.

The small print rollers are used to avoid feeding errors and wear on printhead and print roller due to rubbing. Three different standard widths are available from stock, non-standard widths are manufactured to order.

Common details

for double-sided printing

Big graphic display

White backlight for optimum readability.

2 Ribbon holder

Simple and centered insertion of the ribbon with the three-part tightening axles. The imprinted rule on spindle simplifies ribbon positioning.

3 No printhead adjustment

The printhead is pressed down with two sliding toggles. Due to the centre alignment of the materials there is no need to do adjustments and settings at the printhead.

4 Material guide

Precise printing as the material guide is located directly behind the print roller. The width is automatically adjusted and centered with a single knob.

5 Peripheral connection

Add-on modules such as cutter, perforation cutter and stacker are easy to connect.

Solid metal housing

Made of die-cast aluminum. All components are mounted on it.

7 Roll holder

Available for core diameters from 38 mm. (We provide adapters for core diameters wider than 76 mm for improved label winding). The material is automatically centered. The spring-mounted margin stop ensures constant tension during feeding, thus ensuring a highly precise imprint.

For textile materials

Single-sided printing

Particularly suitable for textile materials. The additionally installed drive roller after the printhead enables the textile material to be reliably separated from the transfer ribbon.

- No adjustment of the printhead for different widths of material
- Print speed for difficult to print materials is reducible
- Operation and control are compatible with the A⁺ series

1.7 Label printer	A4+T
Print resolution dpi	300
Print width up to mm	105,6
Print speed up to mm/s	125

For double-sided printing

For simultaneous front and rear printing of textile materials. The additionally installed drive roller after the printhead enables the textile material to be reliably separated from the transfer ribbon.

- No adjustment of the printhead for different widths of material
- Print speed for difficult to print materials is reducible
- Operation and control are compatible with the A⁺ series

1.8 Label printer	XD4T
Print resolution dpi	300
Print width up to mm	105,6
Print speed up to mm/s	125

We are glad to assist you in the optimum selection of transfer ribbons for the label material.

Accessories

Cutter

Used to cut paper, self-adhesive labels, cardboard, textile or synthetic materials and heat shrink tubes.

Perforation and cutter

Used to enable the perforation of the material for manual separation.

Stacker with cutter

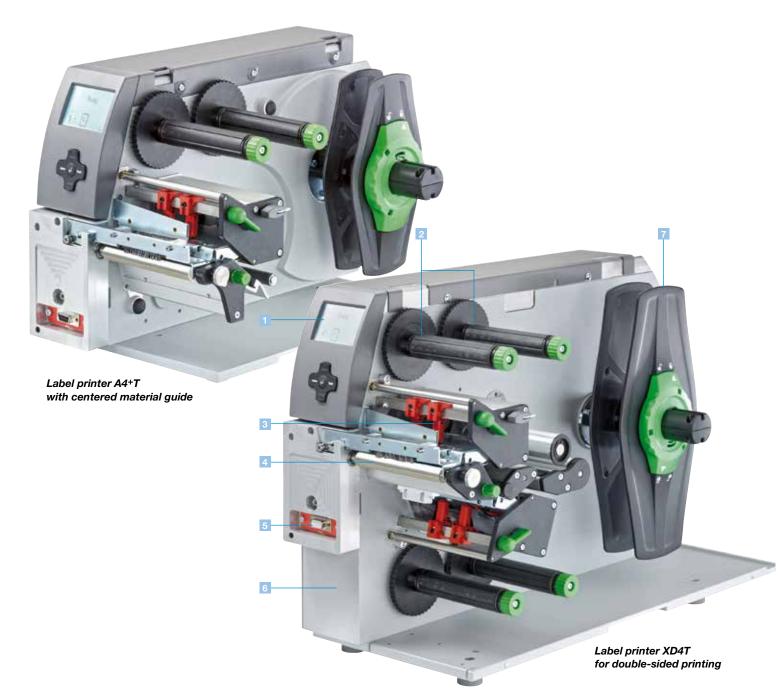

The printed materials are cut and stacked. The print job is stopped as soon as the maximum stack height is reached. Even stiff or curved materials may be processed to some extent. We are pleased to do the material testings at our facilities.

Print rollers for small and thin materials

Outside the material width the printhead rubs against the print rollers. The small print rollers are used to avoid feeding errors and wear on print head and print roller due to rubbing. Three different standard widths are available from stock, non-standard widths are manufactured to order.

Common details

Big graphic display

White backlight for optimum readability.

2 Ribbon holder

Simple and centered insertion of the ribbon with the three-part tightening axles. The imprinted rule on spindle simplifies ribbon positioning.

3 No printhead adjustment

The printhead is pressed down with two sliding toggles. Due to the centre alignment of the materials there is no need to do adjustments and settings at the printhead.

4 Separator roller

The additionally installed separator roller enables the textile material to be reliably separated from the transfer ribbon.

5 Peripheral connection

Add-on modules such as cutter, perforation cutter and stacker are easy to connect.

Solid metal housing

Made of die-cast aluminum. All components are mounted on it.

7 Roll holder

Available for core diameters from 38 mm. (We provide adapters for core diameters wider than 76 mm for improved label winding). The material is automatically centered. The spring-mounted margin stop ensures constant tension during feeding, thus ensuring a highly precise imprint.

The special ones for two-color printing

For two-color printing

- Two in-line arranged thermal transfer print units for simultaneous two-color printing in one label
- Ribbon saver at one print unit
- The XC-series meets the conditions for the Classification and Labeling Inventory according to GHS
- For large label rolls up to a diameter of 300 mm
- The two print units with ribbon holder, operation panel and electronics are adopted from the proven A⁺ series

1.9	Label printer	XC4
	Print resolution dpi	300
	Print width up to mm	105,6
	Print speed up to mm/s	125

1.10 Label printer	XC6
Print resolution dpi	300
Print width up to mm	162,6
Print speed up to mm/s	125

We are glad to assist you in the optimum selection of transfer ribbons for the label material.

Accessories

Cutter

Used to cut paper, self-adhesive labels, cardboard, textile or synthetic materials and heat shrink tubes.

Perforation and cutter

(only for XC4). Used to enable the perforation of the material for manual separation.

Stacker with cutter

(only for XC4). The printed materials are cut and stacked. The print job is stopped as soon as the maximum stack height is reached. Even stiff or curved materials may be processed to some extent. We recommend to do the material testings at our facilities.

Common details

Big graphic display

White backlight for optimum readability.

2 Ribbon holder

Simple and centered insertion of the ribbon with the threepart tightening axles. The imprinted rule on spindle simplifies ribbon positioning.

Straightforward adjustment

The printhead is pressed down with sliding toggles. One is mounted to the left label margin, the other is pushed to the right label margin.

4 Peripheral connection

Add-on modules are easy to connect. All peripherals are connected to the printer in seconds using two pins and fixed in place with a screw.

5 Solid metal housing

Made of die-cast aluminum. All components are mounted on it.

6 Roll holder

For labels up to a diameter of 300 mm. Swing lever and integrated brake make sure that the labels are unwound with constant tension.

7 Ribbon saver for printhead 1

The ribbon saver is used for labels to be partially printed. The printhead is lifted within the unprinted area and the ribbon stopped during label feeding.

8 Fanfold guide

Fanfolded labels are positioned behind the print unit. Guide and additional brake ensure a reliable feeding to the print unit.

¹⁾ Limitations may apply to small labels, thin materials or strong adhesives. These applications need to be tested and approved.

²⁾ The ribbon should roughly be the same width as the label in order to avoid folding.

Accessories-special equipment, interfaces, connecting cables

Extras	Product
2.1	
	Metal cover On request, the label printers A4 ⁺ and A6 ⁺ are available with metal cover. (supplied with A8 ⁺ as standard).
2.2	Print roller DR4-M25 For small and thin materials up to a width of 25 mm.
	Print roller DR4-M50 For very thin materials from a width of 20 up to 50 mm.
	Print roller DR4-M80 For very thin materials up to a width of 80 mm.
2.3	Reflective label sensor from top
2.4	Adapter 100 mm Ø To keep the bending to a minimum during stacking it is recommended to use a large core diameter.
2.5	Memory Card CompactFlash Type I
2.6	Standard keyboard USB Connection: USB, number of keys: 115
2.7	External operation panel If the operation panel is not accessible, e.g. after installation within a facility, an external panel can be installed. Additional slots are available for a CF memory card Type 1 and a host interface.
2.8	Pause adapter PS7 For printing in a label loop. The print job is stopped by the pause signal. The label being printed is finished first. I/O Interface: Inputs: Outputs: no print job Pause, external error printer not ready, print job active
2.9	Tester CC for linear and 2D barcodes The camera tests readability or contents of the horizontally and vertically printed barcodes directly after printing. If the code is faulty the print job is stopped and the label is removed. The Tester CC can be used together with the tear-off mode, dispensing mode or with the external rewinder. Please refer to the Operation Manual for further details.
Interfaces	Product
3.1	Centronics Interface bi-directional acc. to IEEE 1284
3.2	Interface RS422/RS485 1.200 up to 230.400 Baud/8 Bit
3.3	Label selection box – I/O box From a higher-level control, like a PLC, up to 16 different labels can be selected from the memory card. The I/O box enables via abc programming to realize easy programming of the PLC with the 4 in- and outputs.
3.4	WLAN card 802.11 b/g
Connecting cable	
4.1	Connecting cable RS232 C 9/9 pin, length 3 m
4.2	Patch cable CAT5e, 3 m, gray

Accessories - cutting, perforating, stacking labels

Cutter CU

The cutter is used to cut paper, self-adhesive labels, cardboard, textiles or plastics and heat shrink tubes.

Cutter tray

Up to about 50 labels may be collected in the cutter tray.

Cutter	CU2		CU4	CU6	CU8
Used for printer model	A2+	A4+	A4+M, A4+T XD4, XD4T, XC4	A6+ XC6	A8+
Material width up to mm	67	120	110	180	232
Material weight cardboard gr/m ²	60 - 500				
Material thickness mm	0,05 - 0,8				
Cutting length mm			> 5		
Gap height up to mm			2,5		
Cuts / min.	130 120 110 1				100
Stop print job, if	Final position of cutter not reached				
Cutter tray 4 for A4 ⁺ / A4 ⁺ M					
Label height up to mm	100				

Perforation cutter and cutter PCU4

The perforation cutter enables additionally perforating the material for manual separation later on.

Perforation cutter and cutte	r PCU4
Used for printer model	A4 ⁺ , A4 ⁺ M, A4 ⁺ T, XD4, XD4T, XC4
Material width up to mm	85
Material weight cardbaord gr/m	2 60 - 300
Material thickness mm	0,05 - 0,8
Cutting length mm	> 5
Gap height up to mm	4,5
Cuts / min.	Cutting 120 / Perforating 150
Stop print job, if	Final position of cutter not reached
Perforating: Web width mm	0,5
Web distances m	m 2,5 or 10

5.4

5.3

Stacker with cutter ST4

The printed materials are cut and stacked. The print job is stopped as soon as the maximum pile height is reached. Even stiff or curved materials may be processed to some extent.

We recommend to do the material testings at our facilities.

	Stacker with cutter	ST4 / L	ST4 / M		
l	Used for printer model	A4+, XC4	A4 ⁺ M, A4 ⁺ T, XD4, XD4T		
	Material width up to mm	20 - 110	20 - 100		
8	Material weight cardboard gr/m ²		60 - 300		
e,	Material thickness mm	0,05 - 0,8			
	Cutting length mm	20 - 150			
i.	Gap height up to mm	1,2			
2	Cuts / min.	120			
1	Stop print job, if	Final position of cutter not reached, cover open, stack height reached			
	Pile height up to mm	100			

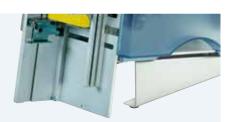

Storage table label W x H

Storage table and protective cover are adapted to the label size and need to be ordered separately.

Base frame A4+

The base frame is used to place the devices on the table in any position.

Accessories - rewinding, unwinding labels

Rewind guide plate RG for internal rewinding

Internal rewinding is done by using the dispensing printer. In this case, the peel-off plate is replaced by the rewind guide plate.

Rewind guide plate	RG2	RG4
Application	A2 ⁺ dispensing version	A4 ⁺ dispensing version
Material width up to mm	67	120

External rewinder ER1/2/3 for direct printer connection

The rewinder is directly screwed onto the printer. Labels are optionally wound either inside or outside. Electronic control of the swing arm ensures a smooth and tight winding.

External rewinder	ER1 / 210		ER2 / 210	ER3 / 210		
Application	A2+	A4+	A6+	A8+		
Material width up to mm	67	120	180	235		
Roll Ø max. mm	205	205	205	205		
Core Ømm	40 / 76					
Label winding		outside	or inside			

External rewinder ER4/6/8 with built-in power supply

The rewinder may be attached to any other printer. All other technical data comply with rewinder ER1/2/3.

External rewinder	E	R4 / 210	E	R4 / 300	ER6/300	ER8/300
Application	A2+	A4+, A4+M A4+T, XC4 XD4, XD4T	A2+	A4+, A4+M A4+T, XC4 XD4, XD4T	A6+, XC6	A8+
Material width up to mm	67	120	67	120	180	235
Roll Ø max. mm	205	205	300	300	300	300
Core Ømm			40 / 76			
Label winding			outside or inside			
Operating voltage		1	00 – 2	240 V~ 50 / 6	0 Hz	
Connecting set for	ER / EU					
Adapter for XC4 / XC6		RG4	RG4		RG6	_

6.4

External unwinder EU4/6/8

The unwinder ensures a smooth label feed for heavy rolls. Both inside and outside wound rolls may be used.

External unwinder		EU4 / 300	EU6 / 300	EU8 / 300	
Application	A2+	A4+, A4+M, A4+T	A6+	A8+	
Material width up to mm	67	120	180	235	
Roll Ø max. mm	300	300	300	300	
Core Ømm	40 / 76				
Label winding		outside o	r inside		

Accessories - dispensing labels

 Label printers (Type "P") for dispensing labels additionally need to have a present adapter or a present sensor.
 Different types for either manual operation, or on demand with hand switch, foot switch or an external signal are available.

	Product				
7.1	Present adapter PS5 for Printing and dispensing th The label is removed by a I/O Interface:	ne label is triggered via e

8.4	Product sensor For automatic product detection on the conveyor belt.	
8.5	Testbox 2 Simulation of automatic operation.	

Dispensing module with dispensing adapter PS5

To apply labels on packaging on a conveyor belt.

The product sensor triggers the printing process.

Labeling is started and at the same time the next label is printed. Conveyor speed and print speed need to be synchronized.

	A5104	A5106		
Application	A4+	A6+		
Label width mm	25 - 116	50 - 176		
Label height mm	25 -	25 - 200		
Product surface	flat			
Product height	fixed			
Product during labeling	in motion with synchronized speed to printer			

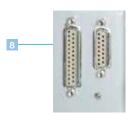

All-round print and apply system

Together with the A1000 applicator the all-round print and apply system enables to apply labels on cylindrical objects around the entire circumference of 360°. The product is put on the rolls and labeling is started via hand or foot switch.

All-round labeler				
Application	A2+, A4+ with applicator A1000-220			
Product diameter mm	12 - 40			
Product surface	cylindrical			
Product during labeling	in rotary motion			
Tamp pad	A1021 / WxH			
Label width mm	25 - 116			
Label height mm	25 - 140			

Applicator A1000

Real-time application

Together with the A2⁺, A4⁺ and A6⁺ printers the A1000 applicator means a cost-effective solution for both semi-automatic operation and for integration into automated product lines.

For operation compressed air of 4,5 bar is needed.

Long service life

The ball-bearing guide bars are low-wearing.

2 Variable product heights

The lifting cylinder allows labeling at different heights. Different stroke heights are available.

3 Pre-dispensing button

For testing the labeling. Pushing the button the first time causes the label to be printed and held by the pad. Pushing the button again starts the application.

4 Compressed air regulation unit

The microfilters prevent contamination, the compressed air regulator ensures the labeling quality.

5 High process reliability

The supporting air jet stream, induction air and lifting speed can be adjusted. The pressure can be reduced to less than 10N (1 kg) for highly sensitive products and packaging. To avoid contamination of the vacuum holes, these are cleaned with air pressure after each application.

6 Label sizes

Labels with a width of 25 – 176 mm and a height of 25 – 200 mm can be applied.

7 upporting air

is used for blowing the label to the pad.

Bigital I/O Interface for applicator

A PLC, sensor or hand switch starts the labeling. At the same time, status and error messages are issued.

Inputs	Outputs
Start	Printer not ready
Print first label	Printer without job
External error	Collective alarm
Stop (external error)	Home position reached
External reset only for 25 pin	Labeling position reached
	Labeling error

Applicator	A1000-220	A1000-300	A1000-400

Cylinder stroke mm	220	300	400
Tamp stroke below device mm	70	150	250
Compressed air bar		4,5	

Accessories - Applicator A1000

Tamps

Labels are applied on the tamp and held by vacuum. The applicator then moves the tamp with label to the product.

Universal tamp pad

The rasterized vacuum holes are covered by a foil and are pierced according to the label size.

Tamp pads are manufactured according to the label size.

	Universal tamp pad				Tamp pa	d	
	A1021 / 70 x 60		A1021 / 90 x 90	A1021 / V		WхН

Product surface			flat				
Product height	variable						
Product during labeling			not movin	g			

Tamp spring-mounted

The spring deflection allows labeling even on inclined surfaces. **Universal tamp pad**

The rasterized vacuum holes are covered by a foil and are pierced according to the label size.

Tamp pads are manufactured according to the label size.

	Universal tamp pad		Tamp pad	
	A1321 / 116 x 102	A1321 / 116 x 102 A1321 / 116 x 152		/ W x H
Application	A4+	A4+	A4+	A6+
Label width mm	25 - 116	25 - 116	25 - 116	50 - 176
Label height mm	25 - 102	25 - 152	25 -	200
Product surface		flat		
Product height	variable			
Product during labeling not moving				

9.6

Blow pad

The label can be blown on in case of pressure-sensitive products. The blow pad moves to a fixed heigth. The product to be printed is positioned about 10 mm below.

Blow pad	A2021		
Application	A2+	A4+	A6+
Label width mm	25 - 63	25 - 116	50 - 176
Label height mm	25 - 100		
Product surface	flat		
Product height	fixed		
Product during labe	eling not moving or moving		

Roll-on pad

Using the roll-on pad the label is moved to below the roll. The pad moves onto the product and the label is rolled on during transport.

Roll-on pad	A14	11	
Application	A4+	A6+	
Label width mm	25 - 116	50 - 176	
Label height mm	80 - 200	80 - 200	
Product surface	fla	t	
Product height	variable		
Product during labe	eling movi	ng	

Applicator A3200

Applicator A3200 - Real time application

The A3200 applicator is used to automatically apply labels that are printed with the A2⁺ / A4⁺ printer.

A rotary cylinder allows positioning the label between 45° and 95° which is then placed on the product via short stroke cylinder. Long service life

The ball-bearing guides are low-wearing.

2 Variable angular position

The rotary cylinder allows labeling on horizontal, inclined and vertical surfaces.

3 Pre-dispensing button

Pushing the button the first time causes the label to be printed and held by the pad. Pushing the button again starts the application.

4 Compressed air regulation unit

The microfilters prevent contamination, the compressed air regulator ensures the labeling quality.

5 High process reliability

The supporting air jet stream, induction air and lifting speed can be adjusted. The pressure can be reduced to less than 10N (1 kg) for highly sensitive products and packaging. To avoid contamination of the vacuum holes, these are cleaned with air pressure after each application.

6 Label sizes

Labels with a width of 4 – 116 mm and a height of 5 – 80 mm can be applied.

Supporting air

is used for blowing the label to the pad.

B Digital I/O Interface for applicator

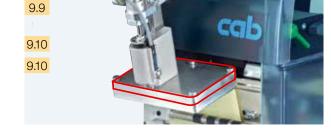

A PLC, sensor or hand switch starts the labeling. At the same time, status and error messages are issued.

Inputs	Outputs
Start	Printer not ready
Print first label	Printer without job
External error	Collective alarm
Stop (external error)	Home position reached
External reset only for 25 pin	Labeling position reached
	Labeling error

Applicator	A3200
Application	A2+ / A4+
Rotary cylinder°	45 - 95°
Lifting cylinder mm	up to 30
Compressed air bar	4.5

Tamp pads or other blow pads are manufactured according to the label size.

	Tamp pa	d A3221	Blow pa	d A3221
Application	A2+	A4+	A2+	A4+
Label width mm	4 - 63	20 - 116	10 - 63	20 - 116
Label height mm	5 - 80		10 - 80	
Product surface		fla	flat	
Product during labeling	not moving		in motion	

Accessories - mounting equipment

Mounting foot (for A2+, A4+)

For fastening the print and apply system and product holder.

Mounting plate

The print and apply system is fastened on the mounting plate.

Profile

Standard lengths are 40, 80, 120 mm. The aluminum square profile can also be manufactured in other lengths upon request.

3 Base plate

For fastening the product holder Standard size: 500 x 255 mm.

Floor stand

The floor stand enables the printer to be quickly and flexibly integrated into any manufacturing line. Height and width of the labeling position are easy to adjust. Four guide rollers at the chassis provide for mobility. The floor stand is adjusted with adjustable feet at the place of destination.

Floor stand	1600
Total height mm	1600
Labeling height up to mm	1400
Projection until middle of label mm	230 - 500
Chassis: Width x depth x height mm	600 x 860 x 140

Printer holder

The A2+, A4+ or A6+ label printers are fixed on the plate and quicklocked.

Label software cablabel® S3

The goal of cablabel[®] S3 is to concentrate the label design, print control and monitoring of all cab marking systems into one software package. The software will also be in sync with future developments of new devices and features.

Highlights

cablabel[®] S3 features the full potential of the cab devices like no other available software: the software utilizes the JScript code to the full extent. cablabel[®] S3 Pro can imports existing JScript files, so you can switch over from R2+ seamlessly. With the new layer technology the user designs a label which works for all established devices and resolutions. The intelligent print control evaluates the device and label parameters to reduce possible sources of error.

cablabel® S3 also maximizes the integration of database connections via Database Connector. After designing the label, the software provides all files to be stored within the printer for data base connections. The software also supports the stand-alone feature as well using the same method. In Addition the software creates interfaces which are easy to handle for the connection to SAP or other peripheral devices like SPC, scales and bar code testers.

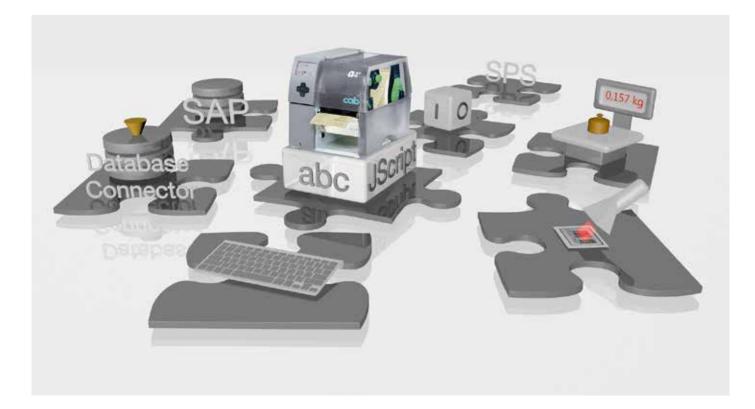

Products

Every company designs and formats their label differently. For example, label creation and production are executed by different employees. To adopt the software package to your needs, cab offers different software packages.

cablabel[®] S3 Lite is offered free of costs with every cab printer and allows you to create and print labels. With cost-saving cablabel[®] S3 Pro you create label designs for technical solutions. cablabel[®] S3 Viewer shows the preview of a label in the Windows Explorer and is delivered free of costs with every cablabel[®] S3. The Viewer may support you for showing examples during the approval processes or supplier requirements. cablabel[®] S3 Print is provided for users in production or warehouse. The user interface is simplified and makes only those functions available which are required for label printing: You select the label in a list and get the layout for visual control. Then you enter the variable information and the amount you want to print. This simplifies your work and reduces possible sources of error.

Other products like cablabel® S3 Pro Laser, Print Laser und Print Server are in preparation.

Integration

No printer is isolated – in a productive environment it is connected to other equipment or networks for control and monitoring. cab offers various possibilities to integrate the printer into your environment.

Control

Every cab printer can be directly coded with the simple programming language *JScript* and an extensive instruction set. The label software cablabel[®] S3 supports optimally JScript, but a JScript program may also be created with any text editor.

As an integrated element of the firmware, the *abc Basic compiler* enables the printer to process data via BASIC programming before it is sent for print editing. That way, you replace external printer languages or integrate data from other systems, e.g. balance or a PLC.

11.4 In the stand-alone mode with additional network connection, the *Database Connector* enables printers to access data directly from a central ODBC-, OLEDB compatible database and to print it as a label.

In cooperation with SAP cab developed the so-called *replace method* to control cab printers quickly and easily from SAPScript using SAP R/3. Using the replace method the host computer only sends the JScript variable, respectively changed data to the printer.

As a Silver Level partner in SAP's Printer Vendor Programm, cab has access to the SAP development environment for optimum printer support in SAP environments.

11.10 The *Programmer's guide* explains and describes commands for different printer models via direct programming with JScript and abc and additionally the connection of the printer to databases via Database Connector.

For the printer control via PC drivers are available for established Windows operating systems, and for A+-printers CUPS-based drivers for Mac OS X and Linux. The drivers ensure optimal stability on your operating system.

Monitoring

Using standard programs such as the web browser or FTP clients, the integrated HTTP and FTP server enables print monitoring, configuration, firmware updates and memory card administration. Status, warning and error messages are sent to administrators or users as e-mails or SNMP datagrams via SNMP and SMTP clients. A time server is used to synchronize time and date.

11.6 The cab Network Manager enables the user to control a number of printers across a network simultaneously. It supports monitoring, configuration, firmware updates, memory card administration, file synchronization and PIN administration centrally.

* SAP is a registered trademark of SAP AG.

Stand-alone operation

Printing without PC

Stand-alone operation is the ability of cab printers to print labels even if these are not connected to the host system.

The label layout is designed with a special label software or direct programming via PC.

Label formats, fonts, font-, text- and graphics data as well as data base contents are saved or read on the CF memory card, USB stick or internal data memory IFFS.

Only variable data to be printed is sent to the printer via keyboard or host. Additionally, data sent by a barcode scanner or balance can be processed.

Easy maintenance

Label sensor

If cleaning might come up the label sensor is unlocked and pulled out with slight finger pressure.

Printhead

The printhead may be exchanged in just a few steps. And no need of doing adjustments and settings.

Print roller

Three screws allow an easy and fast removing of the print roller for cleaning or replacement.

No need for a service technician to perform routine maintenance.

One single tool

For replacing wear parts or mounting peripherals the tool is directly inserted in the printer and at the ready.

Service

Our well-trained service engineers give world-wide support in maintenance and repair of cab printers. Please send your printer to one of cab's service centres or to one of the service partners selected by us. We will check and repair your printer within only a few working days. If requested, we will make a temporary equivalent device available for the time of repair.

Training

We offer training in programming, different software tools, printer drivers and label layout design. We can enhance your knowledge on cab printers to make more effective use of our printers.

We also offer seminars for maintenance and repair.
